PROJECTS

AVIVA UKHE Account

May 2023 - present

- Aviva is a British insurance company that provides insurance, wealth, and retirement services in the UK, Ireland, and Canada.
- Designed and implemented RESTful APIs for various project modules using Spring Boot and Camel with Spring Boot, leveraging Red Hat CodeReady Studio and Maven for build management.
- Conducted comprehensive JUnit testing, debugging, and bug resolution to ensure robust and high-performing APIs.
- Migrated APIs by adhering to a structured process, including code translation, local testing, JUnit integration, Sonar analysis, Checkstyle validation, code reviews, and deployment.
- Utilized Azure DevOps (ADO) to manage pipelines for Maven builds and image creation efficiently.
- Successfully deployed APIs to DEV and SIT environments, ensuring smooth and stable integration.
- Monitored and analyzed application logs post-deployment using the DataDog platform.
- Actively contributed to the project using Agile methodology, participating in sprint planning, daily stand-ups, and retrospectives.
- Maintained and shared detailed daily status reports with leads and management to ensure transparency and progress tracking.
- Fostered effective communication and collaboration with team members to achieve project goals.
