Java Developer

Dedicated Java Developer with 2.8 years of experience in building and supporting Spring Boot batch jobs, REST APIs, backend services, and SOAP/XML-based applications. Skilled in developing clean, reliable, and well-tested code with a strong focus on JUnit-based unit testing. Proficient in Microsoft SQL Server and DevOps tools including GitHub, OpenShift, Gradle, Cycode, and SonarQube. A collaborative team player committed to delivering high-quality, scalable applications.

WORK EXPERIENCE

Tech Mahindra | Software Engineer

September 2023-Present

Project: One Warranty Solutions (OWS) - Ford Vehicles

- Develop **Spring Boot batch jobs** and **RESTful services** using Java (JDK 17) and Gradle to support efficient data processing.
- Build and maintain SOAP/XML-based J2EE applications, including web services and batch job orchestration.
- Optimize application code to improve performance, enhance readability and reducing execution time.
- Write clean, robust, and maintainable code with comprehensive **JUnit 5** unit tests to ensure application reliability.
- Manage code deployments and production releases using **GitHub** and **OpenShift**, ensuring minimal downtime and zero escalations.
- Maintain clear and accurate documentation for work items to support traceability and knowledge sharing.
- Work with **Microsoft SQL Server** for data storage, querying, and performance optimization.
- Collaborate in Agile teams, participating in and hosting client stand-ups to ensure timely delivery.
- **Received the Pat On the Back Award twice** and **Grand Salute LiveWire Award** for consistent dedication, timely delivery, and high-quality project contributions.

Project: CTO - Tech Mahindra

April 2026-Present (Partial Support)

- Develop **RESTful APIs** from scratch using Java (JDK 21) and Maven.
- Write clean, scalable, and maintainable code with comprehensive **JUnit 5** unit tests.
- Manage code promotion and release activities using **GitHub**.
- Maintain technical documentation and support traceability for work items.
- Collaborate in Agile teams and participate in client stand-ups to ensure timely delivery.
- Support **Backend service** enhancement, debugging, and issue resolution.

SKILLS

- **Programming language:** Java
- **Framework:** Spring Boot, Spring MVC, Spring Batch, Microservices, Basic knowledge of Spring AI
- **Security:** Spring Security, OAuth2, and JWT-based authentication
- **Database:** MS SQL Server

- **Data access:** JDBC template, Spring Data JPA (JPA Repository)
- **Application/Web Servers:** Tomcat, Liberty
- **Web services:** SOAP and RESTful APIs
- **Tools & DevOps:** IntelliJ IDEA, Eclipse, Postman, Hoppscotch, GitHub, OpenShift, Tekton, SonarQube, Cycode, SQL Server Management Studio (SSMS), WinSCP, JIRA, Rally
- **Cloud:** Google Cloud Platform
- **Professional skills:** Design Understanding, Issue Analysis and Bug Fixing, Team Collaboration, Effective Communication

EDUCATION

Bachelor of Engineering – Computer Science and Engineering **2019 – 2023**
Kamaraj College of Engineering and Technology, Virudhunagar
 82%

CERTIFICATIONS AND AWARDS

- **Google Cloud Certified** - Associate Cloud Engineer
- **Pat On the Back Award (Two-Time Recipient)** - Team recognition for dedication and commitment
- **Grand Salute LiveWire Award** - Team recognition for unstoppable energy and impact
- **Spring Boot certification** - Udemy
- **Prompt Engineering** - IBMSkillsNetwork
